Attorneys for Plaintiff, VICTORIA MARTINEZ

DECLARATION OF MARTIN SOHAL

I, Martin Sohal, declare as follows:

1. I am a resident of Turlock, California. I am a former employee of Stanislaus Food Products Company (hereinafter "Stanislaus Food") and am one of the named plaintiffs in this case.

2. I am over the age of eighteen. I have personal knowledge of the following facts, and if called to testify, I could and would testify competently to them.

3. I am aware that filing a class action lawsuit against my former employer would require me to work with my attorneys. I worked closely with my attorneys in filing the lawsuit, assisting the discovery process, mediation, and settlement discussions. I am familiar with all aspects of the litigation, and I participated in all stages of it.

4. I am not aware of any conflicts that would prevent me from serving as a class representative in this matter. I do not have any business or personal relationships with any of my attorneys other than me retaining them to represent me in this lawsuit.

Employment History

5. I worked for Stanislaus Food from approximately August 2023 through October 2023, at its Modesto, California location.

6. During that time, I worked as a non-exempt, hourly employee, with my position as a forklift driver, earning \$28.50 per hour.

Typicality of Claims

7. During my time working for Stanislaus Food, I was not paid for all the hours that I worked, including, but not limited to, overtime and minimum wages.

8. I was also not provided with all my entitled meal and rest periods nor compensated at my regular rate of pay for any noncompliant meal and rest periods.

9. During the entire period of my employment with Stanislaus Food, my paycheck stubs were not accurate because they did not reflect gross wages earned, net wages earned, all applicable hourly rates, or applicable deductions as a result of Stanislaus Food not compensating me for all hours that I worked. The lack of this information on my paycheck stubs subjected me

1 to the difficulty of having to reconstruct the hours I actually worked, and compensation earned
2 during a pay period.

3 10. I was also not provided with all paid sick leave.

4 11. Lastly, I was not paid all wages owed at the time of my termination.

5 **My Involvement in the Litigation & Adequacy as Class Representative**

6 12. I participated in all aspects of this litigation. Initially, I participated in a pre-
7 litigation investigation, then I assisted with the drafting of the complaint, provided
8 documentation, and was involved in settlement discussions and mediation. I have had numerous
9 discussions with my attorneys over the course of this matter.

10 13. I also spent a considerable amount of time learning about California labor laws,
11 deciding whether pursuing a lawsuit was a step I should take. I had to research attorneys and
12 research whether I had claims that were actionable under California law. Through my research, I
13 located experienced wage and hour attorneys and met with them to determine if I would retain
14 them to handle my case. We spent several hours discussing my case, reviewing my records, and
15 discussing the remedies I could pursue. When I decided to file a lawsuit, I decided not to just file
16 a lawsuit on behalf of myself, but also those of my former co-workers by filing a class-action
17 lawsuit against Stanislaus Food for its violations of labor laws. My attorneys and I discussed what
18 it meant to be a class representative, and I understood I would have to devote a significant amount
19 of my time to this lawsuit.

20 14. I spent several hours “educating” my attorneys about Stanislaus Food’s policies
21 and practices. I searched for, and produced, documents that I had from my employment and what
22 my concerns with them were.

23 15. I also made sure that I was available to speak to my lawyers and was fully prepared
24 for mediation as part of my duty as the class representative.

25 16. I have spent considerable time and attention working on this case.

26 17. I believe I have fairly represented the absent class and request that the Court
27 approve this settlement and confirm me as a class representative. I have always maintained the
28 best interest of the class while performing my class representative duties. I am not aware of any

conflicts of interest that would prevent me from being confirmed as the class representative in this lawsuit.

18. I am not related in any way to my lawyers or any other employee of the law firm that is representing me. I do not have business dealings or other involvement with my attorneys beyond this lawsuit and this representation. I was not promised any money or any type of bribe or gift to serve as the class representative in this action.

My Understanding Regarding the Terms of the Settlement

19. I understand that as part of this class action settlement, I am required to provide Stanislaus Food with a full and complete release of all claims, known and unknown, and that this is something that other class members do not have to provide. I understand that this means that I will be giving up any claims I may have against Stanislaus Food. I have agreed to this term because I think it is in the best interests of the class and this settlement.

20. As I discussed above, I participated significantly in this lawsuit, on behalf of myself and for the Settlement Class. As a class representative, I have been actively involved in all stages of the litigation and have been continually updated, and I participated in all aspects of my lawsuit. I would frequently call my attorneys to see how I could assist in moving the lawsuit forward. I estimate that I have spent significant time in the litigation of this case, including searching for documents related to my employment, providing necessary documents in preparation of mediation, and fielding numerous phone calls, emails, and letters from my attorneys.

21. In addition to my hours spent participating in the prosecution of this case, I was nervous filing this lawsuit because I knew I was taking a very big risk by coming forward and filing a class action. I was aware that my name could be in the public domain. I also knew that if I lost this case, I could have been held liable for Stanislaus Food's litigation costs, which would have destroyed me financially. Moreover, there was an increased the risk of retaliation by prospective employers. This lawsuit has cost Stanislaus Food considerable resources and such conduct might be of interest to future prospective employers.

22. In light of the time that I have put into this case since the original meetings and

1 conversations in approximately October 2023 through the present, including my continued
2 commitment to the case and the risks that came with being a named plaintiff, I respectfully request
3 that the Court grant a service payment of up to \$5,000, in an amount that the Court deems to be
4 fair and appropriate. I believe a significant award is warranted here because of the result achieved,
5 the many hours of my personal time that I have invested in the case, my commitment to seeing it
6 through to a strong settlement for my co-workers, and my release of all other claims that I may
7 have against Stanislaus Food.

8 I declare under penalty of perjury under the laws of the State of California that the
9 foregoing is true and correct to the best of my personal knowledge. This declaration is executed
10 on November 19, 2024, at Turlock, California.
